benchchristiandelaluna2@gmail.com | (+63)9932428909 | Bench Christian Dela Luna

Final-year IT Business Analytics student passionate about software development, data analytics, and emerging technologies, particularly artificial intelligence. Continuously exploring modern tools and techniques to improve both system development and data-driven insights. Motivated to build solutions that turn data and ideas into practical products that help businesses make better decisions and improve user experiences.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, SQL, PHP
Frontend: React.js, Tailwind
Backend: Node.js, Express.js, Laravel
Databases: PostgreSQL
Testing: Playwright, Manual Testing, Automated Testing, End-to-End Testing
Analytics: Microsoft Excel, Power BI, Google Looker Studio
Tools: Git, GitHub, OWASP ZAP, Nmap, Nikto
AI: Python Prophet, Gemma

WORK EXPERIENCE

Software Development & Quality Assurance Intern **February 2026 - May 2026**
ACTION CENTER - Batangas State University

- Deployed to Center for AI and Smart Technologies (CAIST) as part of internship rotation.
- Designed and executed manual test cases for a large-scale web application, documenting expected and actual results, identifying defects, and recommending improvements to system functionality and user experience.
- Performed automated and end-to-end testing using Playwright to validate application workflows, verify frontend-backend integration, and ensure compliance with functional requirements.
- Participated in code reviews and security testing using tools such as Nmap, Nikto, and OWASP ZAP, contributing to software quality, maintainability, and vulnerability assessment efforts.
- Proposed and led the development of an AI-powered recommendation feature prototype that streamlined assessment creation by suggesting reusable content based on performance analytics and learning outcome data.
- Designed, implemented, and documented the prototype's workflows, business logic, and technical specifications to support future development and potential production integration.

PROJECTS

A Web-Based Centralized Inventory Management System with Decision Support System for L-Jean Trading Construction and Supply
Lead Developer & QA Tester | PERN Stack, PostgreSQL, Python Prophet

- Led the development and testing of a centralized inventory management system that provides real-time stock monitoring, delivery tracking, and inventory notifications across multiple business branches.
- Designed and implemented a decision support dashboard that analyzes sales and inventory data to track product profitability, revenue contribution, and operational performance.
- Developed demand forecasting and automated restocking features using Python Prophet, helping predict inventory requirements and reduce stock shortages and overstocking.
- Collaborated directly with stakeholders throughout requirements gathering, system validation, and feature reviews to ensure the solution aligned with business needs and operational workflows.

EDUCATION

Batangas State University - The National Engineering University **Expected: August 2026**
BS Information Technology with Specialization in Business Analytics

Immaculate Heart of Mary Academy **2016 - 2022**
Science, Technology, Engineering, Mathematics
